

# VMware Horizon: Deploy and Manage V8.x

## VMware Horizon: Deploy and Manage V8.x

This five-day course gives you the hands-on skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform. You build on your skills in configuring and managing VMware Horizon® 8 through a combination of lecture and hands-on labs. You learn how to configure and deploy pools of virtual machines and how to provide a customized desktop environment to end-users. Additionally, you learn how to install and configure a virtual desktop infrastructure platform. You learn how to install and configure VMware Horizon® Connection Server™, VMware Unified Access Gateway™, how to configure a load balancer for use with Horizon, and how to establish Cloud Pod Architecture.

### Kursinhalt

- Course Introduction
- Introduction to VMware Horizon
- Introduction to Use Case
- vSphere for VMware Horizon
- Create Windows Desktops
- Create Linux Desktops
- Creating and Managing Desktop Pools
- VMware Horizon Client Options
- Creating and Managing Instant-Clone Desktop Pools
- Creating RDS Desktop and Application Pools
- Monitoring VMware Horizon
- Horizon Connection Server
- Horizon Protocols
- Graphics in Horizon
- Securing Connections: Network
- Securing Connections: Authentication
- Horizon Scalability
- Horizon Cloud and Universal Broker
- Workspace ONE Access and Virtual Application Management

**E-Book** Sie erhalten englischsprachige Unterlagen von VMware als E-Book.

### Zielgruppe

Tier 1 Operators, administrators, and architects for VMware Horizon

### Voraussetzungen

Before attending this course, you must have the following skills:

- Use VMware vSphere® Web Client to view the state of virtual machines, datastores, and networks
- Open a virtual machine console on VMware vCenter® and access the guest operating system
- Create snapshots of virtual machines
- Configure guest customization specifications
- Modify virtual machine properties
- Convert a virtual machine to a template
- Deploy a virtual machine from a template

You must also have the following Microsoft Windows system administration experience:

- Configure Active Directory services, including DNS, DHCP, and time synchronization
- Restrict user activities by implementing Group Policy Objects
- Configure Windows systems to enable Remote Desktop Connections
- Build an ODBC connection to an SQL Server database

### Kursziel

VMware Certified Professional – Desktop and Mobility (VCP-DTM).

Stand 27.04.2024

### Dieser Kurs im Web

Alle tagesaktuellen Informationen und Möglichkeiten zur Bestellung finden Sie unter dem folgenden Link:  
[www.experteach.de/go/VHDM](http://www.experteach.de/go/VHDM)

### Vormerkung

Sie können auf unserer Website einen Platz kostenlos und unverbindlich für 7 Tage reservieren. Dies geht auch telefonisch unter 06074 4868-0.

### Garantierte Kurstermine

Für Ihre Planungssicherheit bieten wir stets eine große Auswahl garantierter Kurstermine an.

### Ihr Kurs maßgeschneidert

Diesen Kurs können wir für Ihr Projekt exakt an Ihre Anforderungen anpassen.

Training	Preise zzgl. MwSt.
Termine in Deutschland	5 Tage € 3.295,-
Termine in Österreich	5 Tage € 3.295,-

## VMware Horizon: Deploy and Manage V8.x

<b>1 Course Introduction</b>	for Microsoft Teams	<b>• List the steps to configure graphics cards for use in a Horizon environment</b>
<ul style="list-style-type: none"> <li>• Introductions and course logistics</li> <li>• Course objectives</li> </ul>		
<b>2 Introduction to VMware Horizon</b>	<b>9 Creating and Managing Instant-Clone Desktop Pools</b>	<b>15 Securing Connections: Network</b>
<ul style="list-style-type: none"> <li>• Recognize the features and benefits of Horizon</li> <li>• Describe the conceptual and logical architecture of Horizon</li> </ul>	<ul style="list-style-type: none"> <li>• List the advantages of instant clones</li> <li>• Explain the provisioning technology used for instant clone desktop pools</li> <li>• Set up an automated pool of instant clones</li> <li>• Push updated images to instant clone desktop pools</li> </ul>	<ul style="list-style-type: none"> <li>• Compare tunnels and direct connections for client access to desktops</li> <li>• Discuss the benefits of using Unified Access Gateway</li> <li>• List the Unified Access Gateway firewall rules</li> <li>• Configure TLS certificates in Horizon</li> </ul>
<b>3 Introduction to Use Case</b>	<b>10 Creating RDS Desktop and Application Pools</b>	<b>16 Securing Connections: Authentication</b>
<ul style="list-style-type: none"> <li>• Convert customer requirements to use-case attributes</li> <li>• Define a use case for your virtual desktop and application infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>• Explain the difference between an RDS desktop pool and an automated pool</li> <li>• Compare and contrast an RDS session host pool, a farm, and an application pool</li> <li>• Create an RDS desktop pool and an application pool</li> <li>• Access RDS desktops and application from Horizon Client</li> <li>• Use the instant clone technology to automate the build-out of Remote Desktop Session Host farms</li> <li>• Configure load-balancing for RDSHs on a farm</li> </ul>	<ul style="list-style-type: none"> <li>• Compare the authentication options that Horizon Connection Server supports</li> <li>• Restrict access to the Horizon remote desktops using restricted entitlements</li> <li>• Describe the smart card authentication methods that Horizon Connection Server supports</li> <li>• Explain the purpose of permissions, roles, and privileges in VMware Horizon</li> <li>• Create custom roles</li> </ul>
<b>4 vSphere for VMware Horizon</b>	<b>11 Monitoring VMware Horizon</b>	<b>17 Horizon Scalability</b>
<ul style="list-style-type: none"> <li>• Explain basic virtualization concepts</li> <li>• Use VMware vSphere® Client™ to access your VMware vCenter System and VMware ESXi™ hosts</li> <li>• Create a Windows virtual machine using vSphere</li> </ul>	<ul style="list-style-type: none"> <li>• Monitor the status of the Horizon components using the Horizon Administrator console dashboard</li> <li>• Monitor desktop sessions using the HelpDesk tool</li> <li>• Monitor the performance of the remote desktop using the Horizon Performance Tracker</li> </ul>	<ul style="list-style-type: none"> <li>• Describe the purpose of a replica connection server</li> <li>• Explain how multiple Horizon Connection Server instances in a pod maintain synchronization</li> <li>• List the steps to configure graphics cards for use in a Horizon environment</li> <li>• Configure a load balancer for use in a Horizon environment</li> <li>• Explain Horizon Cloud Pod Architecture LDAP replication.</li> <li>• Explain Horizon Cloud Pod Architecture scalability options</li> </ul>
<b>5 Create Windows Desktops</b>	<b>12 Horizon Connection Server</b>	<b>18 Horizon Cloud and Universal Broker</b>
<ul style="list-style-type: none"> <li>• Outline the steps to install Horizon Agent on Windows virtual machines</li> <li>• Install Horizon Agent on a Windows virtual Machine</li> <li>• Optimize and prepare Windows virtual machines to set up Horizon desktop VMs</li> </ul>	<ul style="list-style-type: none"> <li>• Recognize the VMware Horizon reference architecture</li> <li>• Identify the Horizon Connection Server supported features</li> <li>• Identify the recommended system requirements for Horizon Connection Server</li> <li>• Configure the Horizon event database</li> <li>• Outline the steps for the initial configuration of Horizon Connection Server</li> <li>• Discuss the AD LDS database as a critical {an important component?} component of the Horizon Connection Server installation</li> </ul>	<ul style="list-style-type: none"> <li>• Recognize the features and benefits of Horizon Cloud Service</li> <li>• Use Universal broker to connect to a Horizon Cloud instance</li> <li>• Configure and pair the Horizon Cloud Connector appliance with Horizon Connection Server</li> </ul>
<b>6 Create Linux Desktops</b>	<b>13 Horizon Protocols</b>	<b>19 Workspace ONE Access and Virtual Application Management</b>
<ul style="list-style-type: none"> <li>• Create a Linux VM for Horizon</li> <li>• Install Horizon Agent on a Linux virtual machine</li> <li>• Optimize and prepare Linux virtual machines to set up Horizon desktop VMs</li> </ul>	<ul style="list-style-type: none"> <li>• Compare the remote display protocols that are available in VMware Horizon</li> <li>• Describe the BLAST Display Protocol Codecs</li> <li>• Summarize the BLAST Codec options</li> <li>• List the ideal applications for each BLAST codec</li> <li>• Describe the BLAST and PCoIP ADMX GPO common configurations</li> </ul>	<ul style="list-style-type: none"> <li>• Recognize the features and benefits of Workspace ONE Access</li> <li>• Explain identity management in Workspace ONE Access</li> <li>• Explain access management in Workspace ONE Access</li> <li>• Describe the requirements to install and configure True SSO in a Horizon environment</li> <li>• Describe the Workspace ONE Access directory integration</li> <li>• Deploy virtual applications with Workspace services</li> </ul>
<b>7 Creating and Managing Desktop Pools</b>	<b>14 Graphics in Horizon</b>	
<ul style="list-style-type: none"> <li>• Identify the steps to set up a template for desktop pool deployment</li> <li>• List the steps to add desktops to the VMware Horizon® Connection Server™ inventory</li> <li>• Compare dedicated-assignment and floating-assignment pools</li> <li>• Outline the steps to create an automated pool</li> <li>• Define user entitlement</li> <li>• Explain the hierarchy of global, pool-level, and user-level policies</li> </ul>	<ul style="list-style-type: none"> <li>• Describe the 3D rendering options available in Horizon 8</li> <li>• Compare vSGA and vDGA</li> </ul>	
<b>8 VMware Horizon Client Options</b>		
<ul style="list-style-type: none"> <li>• Describe the different clients and their benefits</li> <li>• Access the Horizon desktop using various Horizon clients and HTML</li> <li>• Configure integrated printing, USB redirection, and the shared folders option</li> <li>• Configure session collaboration and media optimization</li> </ul>
